CALIFORNIA POSTSECONDARY
EDUCATION COMMISSION

Summary

This first edition of *Student Profiles* seeks to provide comprehensive information about students in postsecondary education in California. It contains information on first-time freshmen and transfer students that used to appear in other Commission reports as well as many new facts from the Commission's computerized integrated student data system. Unlike most Commission reports, it contains little textual comment and analysis about the data. Instead, the Commission hopes that it will provide the basis for such analysis by others.

Student Profiles is divided into these six sections

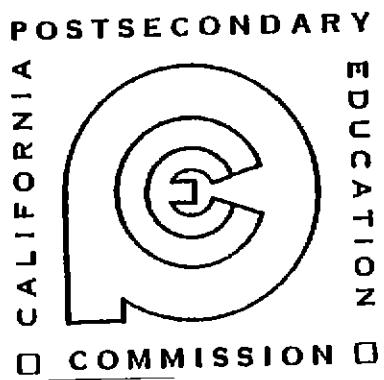

- 1 *All Students*, which provides information about all of California's college and university students in order to provide a context for later sections and an overview of how California's student body has changed over the last decade
- 2 *Participation Rates*, containing information about rates of enrollment in California higher education for various demographic categories of students as developed by the California Department of Finance
- 3 *First-Time Freshmen and New Students*, reporting information regarding recent high school graduates, the origin of new first-time freshmen, average age of these freshmen, and their sex and ethnic distribution
- 4 *Transfer Students*, offering information on community college transfers to the State's universities as well as transfer students from the other segments
5. *Student Outcomes*, reporting the number of degrees awarded by California's colleges and universities and which eventually will report graduation rate, student attrition, and persistence information
- 6 *Area Specific Student Data*, providing information on high school graduates and college-going rates by county, and community college transfer students by community college

The Policy Development Committee of the Commission discussed this report at its meeting on October 29, 1990. Additional copies may be obtained from the Publications Office of the Commission at (916) 324-4991. Questions about the substance of the report may be directed to Marc C Irish, Director of Information Systems of the Commission, at (916) 322-8002.

Introduction

THIS IS the first edition of *Student Profiles*, issued by the California Postsecondary Education Commission to provide comprehensive information about students in postsecondary education in California. *Student Profiles* contains a wide-ranging set of graphs and statistical tables that allows readers to gain an understanding of the characteristics of California students as well as trends in these characteristics, including eligibility for college and university admission, enrollment, transfer, and program completion. Unlike most Commission reports, *Student Profiles* contains little textual comment and analysis about the data. Instead, the Commission hopes that it will provide the basis for such analysis by others.

The primary purposes of *Student Profiles* are five-fold:

- 1 To provide a context to facilitate policy analysis by presenting a global view of students in California,
- 2 To permit prompt response to basic inquiries regarding student information,
- 3 To serve as a basic source of data for research,
- 4 To function as the Commission's "official" guide to student statistics (that is, by supplying correct, agreed-upon data, even if disagreement exists about how these data might be used in different policy analyses), and
- 5 To stimulate the production of special topical reports when specific trends in higher education warrant more detailed analysis and description.

Organization of the profiles

Student Profiles is divided into these six sections.

1 All Students

The first section provides information about all of California's college and university students in order

to provide a context for later sections and an overview of how California's student body has changed over the last decade.

2. Participation Rates

The second section contains information about rates of participation in California higher education for various demographic categories of students as developed by the California Department of Finance. Data in this section highlight how well or poorly various groups of students are doing in terms of access to higher education. These data might be used to model what could happen to enrollment levels with changes in participation rates.

These participation rate data differ from the Commission's traditional college-going rate in that they are based on total population in the State whereas the college-going rate is based on recent high school graduates. While the college-going rate data works well for projecting enrollment at the University of California and many accredited Independent institutions, it is less appropriate for the California State University and the California Community Colleges because their students tend to be older when they enroll in college. Thus, for long-range planning purposes, participation rates provide a better indicator of enrollment trends.

3 First-Time Freshmen and New Students

This third section includes data that were formerly displayed in the Commission's annual *College-Going Rates* reports. In addition to information regarding recent high school graduates, data in this section reflects the origin of new students, average age of all first-time freshmen, and sex and ethnic distribution of new students.

4 Transfer Students

This fourth section contains information on community college transfers as well as facts about transfer students from the other segments. The Commission previously published this information in its annual

Update of Community College Transfer Statistics
However, information in this section has been expanded in order to portray a more accurate sense of student flow, including transfers between campuses of the same segment and "reverse transfer" students -- those who begin their higher education in a four-year institution and then transfer to a community college

5 Student Outcomes

The fifth section of this first *Student Profiles* report provides information on student outcomes. Ultimately, the Commission would like to present information beyond simply reporting the number of degrees awarded by California's colleges and universities including graduation rate, student attrition, and persistence information once student-specific data based on unique student identifiers is available. In the absence of student identifiers, the Commission intends to include more information in subsequent *Student Profiles* based on the results of its current student cohort study

6 Area Specific Student Data

The sixth and final section of *Student Profiles* provides information on high school graduates and college-going rates by county and on community college transfer students. These tables were previously published in the Commission's annual *College-Going Rates* report and its annual *Update of Community College Transfer Statistics*, respectively

Sources of the data

California's colleges and universities are the sources from which the Commission assembles *Student Profiles*. The State's public universities and four-year colleges submit all of their enrollment and degree data to the Commission on machine-readable magnetic computer tape. The California Community Colleges submit their data to their Chancellor's Office, which currently transmits only their enrollment data to the Commission on tape and their degree data on hardcopy survey forms. California's independent colleges and universities submit all of their data to the Commission using hardcopy survey forms generated from the National

Center for Education Statistics Integrated Postsecondary Education Data System (IPEDS) of the United States Department of Education

Categorization of independent institutions

In order to reflect the diversity that exists within California's independent sector of higher education and to facilitate meaningful comparisons with their public-sector counterpart institutions, the Commission arrays data from the State's independent colleges and universities in three groups that are comparable to the public segments. The criteria used by the Commission to establish these groups were (1) the set of high school courses required by the institution for admission, (2) the range of acceptable admission test scores for incoming students, and (3) the minimum high school grade-point-average required for admission. The three groups are

- 1 Independent institutions with admission standards comparable to the University of California,
- 2 Independent institutions with admission standards comparable to the California State University, and
- 3 Two-year independent institutions

The following list identifies these institutions by their group classification

Group 1

- 1 California Institute of Technology
- 2 Claremont Graduate School
- 3 Claremont McKenna College
- 4 Harvey Mudd College
- 5 Loyola Marymount University
- 6 Mills College
- 7 Occidental College
- 8 Pepperdine University
- 9 Pitzer College
- 10 Pomona College
- 11 Saint Mary's College of California
- 12 Santa Clara University
- 13 Scripps College
- 14 Stanford University
- 15 Thomas Aquinas College
- 16 University of the Pacific
- 17 University of Redlands

- 18 University of San Diego
- 19 University of San Francisco
- 20 University of Southern California
- 21 Westmont College
- 22 Whittier College

Group 2

- 1 Azusa Pacific University
- 2 Biola University
- 3 California Baptist College
- 4 California Lutheran College
- 5 Chapman College
- 6 Christ College Irvine
- 7 Christian Heritage College
- 8 College of Notre Dame
- 9 Dominican College of San Rafael
- 10 Fresno Pacific College
- 11 Holy Names College
- 12 Loma Linda University
- 13 The Master's College
- 14 Mount Saint Mary's College
- 15 Point Loma Nazarene College
- 16 Southern California College
- 17 United States International University
- 18 University of La Verne
- 19 Woodbury University

Group 3

- 1 American Academy of Dramatic Arts West
- 2 Brooks College
- 3 College for Developmental Studies
- 4 College of Oceaneering
- 5 Condie Junior College of Business and Technology
- 6 Don Bosco Technical Institute
- 7 D-Q University
- 8 Fashion Institute of Design and Merchandising
- 9 Marymount College, Palos Verdes
- 10 National Technical Schools
- 11 Queen of the Holy Rosary
- 12 San Francisco College of Mortuary Science

Data from only those independent institutions that have consistently provided data to the Commission over the last ten years have been included in the following tables, in order to allow trend analyses of the independent sector at large

Finally, because the following information about the independent colleges and universities comes solely from their IPEDS survey forms, which provide

data only in aggregate format, the Commission is more limited in how to present it than for public institutions. In addition, those survey forms do not collect all of the information that the Commission collects through its individual student record data system.

Caveats

Three limitations of all the following data should be noted:

- One is simply that the statistics involve actual numbers of students -- "headcount students" -- rather than calculations of full-time-equivalent students.
- The second is that while *Student Profiles* includes statistics on students in the State's four major segments of higher education -- the California Community Colleges, the California State University, the University of California, and California's regionally accredited independent institutions -- it does not cover statistics on two other areas of interest to the Commission (1) the State's private institutions that seldom submit student data to the Commission -- its non-accredited degree-granting colleges and universities, and its non-degree-granting institutions such as business schools and flight-training institutes -- and (2) California students attending college in other states. Both of these types of statistics are needed for *Student Profiles* to present a fully comprehensive picture of college-going behavior on the part of California's young people.
- Third, data for some years for some independent institutions have been imputed in order to more accurately portray the student characteristics of these institutions.

Format of report and availability of data

The Commission publishes *Student Profiles* in a loose-leaf format to fit in three-ring binders so that additional tables can be added easily to the report. This allows the Commission's staff to provide updates to particular tables on a more timely and regular basis than might otherwise be possible. In ad-

dition to the published report itself, the Commission provides the data contained in this report on floppy disk or magnetic computer tape (The data tables were created using Excel and the graphics were created using Excel and Harvard Graphics)

ments to obtain new information about student access to higher education, particularly that proposed by SB 507 (Hart) about student application, admission and enrollment patterns for freshmen and transfer students. The Commission will request the participation of the segments, through an intersegmental advisory committee, for these purposes

Feedback about the report

Student Profiles will be published annually by the Commission as part of its "postsecondary education information clearinghouse" responsibilities. This year, the Commission staff plans to improve the quality and usefulness of these profiles by soliciting feedback from the segments and others. In addition, Commission staff plan to work with the seg-
